~ $ cat profile.txt

GenAI pipeline TD, bringing generative AI tools and workflows into how shows get made, after 15+ years in visual effects, many of them as an asset supervisor leading asset teams and the models, textures and look development for films and series, including **The Mandalorian**, **House of the Dragon** and **Avatar: The Last Airbender**.

Known for mentoring artists, coaching teams and teaching practical workflows, and for building supportive teams that deliver strong production results.

Outside the studio I build free, open-source apps, **harlo** and **ComfyPilot** among them, and teach ComfyUI and AI workflows on my YouTube channel, Arctic Latent.

1 Experience

~ $ cat experience

Stellar Creative Lab — Aug 2026 – Present
GenAI Pipeline TD — Permanent full-time
- Bring generative AI tools and workflows into how shows get made.

Sony Pixomondo — Toronto, Canada
Asset Supervisor — 2023 – 2026
- Led asset teams of 5+ artists across film and episodic productions: coaching and mentoring artists, reviewing quality, aligning delivery priorities, supporting team growth, and improving communication and workflows across the pipeline.

Lead Asset Artist — 2022 – 2023
- Led asset creation for high-end VFX projects across a team of 3+ artists, guiding look development, task execution, and consistency across modeling, texturing and delivery.

Senior Asset Artist — 2021 – 2022
- Produced hero and environment assets for film and television, focused on modeling, texturing, shading and production-ready delivery.

Asset Artist — 2017 – 2021
- Built 3D assets for major VFX productions, contributing modeling, texturing and surfacing across shows and features.

Arctic Latent — 2025 – Present
AI Workflow Designer, Educator & Tool Builder
- Created and run Arctic Latent, a YouTube channel of ComfyUI tutorials, AI workflow education, and practical guidance for Windows and Linux creative pipelines.
- Teach advanced node-based workflows for image and video generation, turning complex ComfyUI setups into clear, repeatable processes for artists and creators.
- Build free, open-source apps, including harlo and ComfyPilot.

Seneca Polytechnic — Toronto, Canada
3D Surfacing Teacher — 2019 – 2023
- Taught surfacing, texturing and shading workflows to 25+ students, mentoring them in production-ready asset creation, artistic decision-making and technical pipeline practices.

2 Apps

~/tools $ ls apps

harlo Linux · iPhone · Rust, Qt 6, SwiftUI
Your coding agents in one native app: Claude Code and the harlo agent, with an iPhone app to follow and answer them. harlo.run

ComfyPilot Linux · Windows · Rust, Qt 6
Install, run and keep ComfyUI up to date, with the right models, LoRAs and workflows for your GPU. github.com/ArcticLatent/ComfyPilot

3 Credits & more

~/film $ ls credits

Final Destination: Bloodlines Borderlands
Avatar: The Last Airbender 8 ep
House of the Dragon 8 ep Goliath 10 ep
The Mandalorian 4 ep Star Trek: Discovery 21 ep
Carnival Row 8 ep Colony 6 ep See 1 ep
The Stand 1 ep Midway
Goosebumps 2: Haunted Halloween
